

Postdoctoral position - medical bioinformatics

Ron Shamir's Computational Genomics lab at Tel Aviv University is inviting applications for postdoctoral positions in development of algorithms for clinical genomics and precision medicine.

We seek a highly creative, independent, strongly motivated researcher to join our lab (acgt.cs.tau.ac.il) at the School of Computer Science, Tel Aviv University. The group develops new computational methods for high throughput genomics, medical informatics and gene regulation. The postdoc will work in collaboration with other group members on developing methods for analysis of medical and genomic data, using techniques from machine learning, optimization, graph algorithms and probability. Strong theoretical background, and ability and willingness to program are required. Background in bioinformatics and biology is preferred but not essential.

Starting date: asap.

Please send your CV and have three reference letters sent directly to: gilit@tauex.tau.ac.il
